PZA

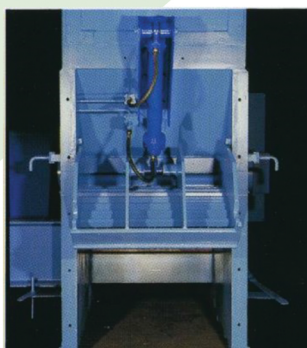

Recycling our past for a better future

PZA | FEATURES

The Lyndex PZA confidential shredder is ideal for shredding entire files; all confidential papers; bundled, glued or loose without problems. In short: the PZA will shred confidential documents of all grades into any of three pre-selected particle sizes. By the manually operated valve control one can hydraulically adjust the desired shred size even while the machine is running. With this confidential shredder you are fully equipped to cope with today's and the future's confidential destruction requirements. Adjustable shred sizes (dependent on the type of material and the extent of wear of the shredder tools):

- Coarse: particle size not defined
- Medium: approx. 50 x 50mm
- Fine: approx. 25 x 25mm

GRID OPEN

GRID CLOSED

	PZA 82/55	PZA 82/75	PZA 82/90	PZA 82/110
Drive Power	55/75 kW/HP	75/100 kW/HP	90/122 kW/HP	110/150 kW/HP
Rotating Hammers Diameter	970 mm	970 mm	970 mm	970 mm
